

Client Management System

In Client Management System Project we use PHP and MySQL Database. This project keeps the records of clients. Client Management System has two modules ie. Admin and client.

Project Requirements :

Language Used : PHP

Database : MySQL 5.x

User Interface Design : HTML, CSS, JS

Software : Wamp/Xamp

Modules :

- Admin
- Client

Admin-

- **Dashboard:** In this section, admin can briefly view the total services, total clients, total today's sales, total yesterday's sales, last seven day's sales, and total sales.
- **Services:** In this section, admin can manage services (Add/Update).
- **Add Clients:** In this section, admin can add new clients
- **Clients List:** In this section, admin can update the client details and add services that are provided by the admin.
- **Invoices:** In this section, admin can view the invoices of the client and also take print of the invoice.
- **Reports:** In this section, admin can view the client's details and check the sales reports(month-wise/year wise) in a particular period.
- **Search Invoice:** In this section, admin can search for clients' invoices with the help of his/her invoice number.

Client-

- **Dashboard:** It is a welcome page for a client.
- **Invoices:** In this section, client can view the invoices of the client and also take print of the invoice.
- **Search Invoice:** In this section, client can search his/her invoice with the help of the invoice number.
